

Title: Manage Group Permissions**Description:**

This document explains how to manage group-based access permissions in the system.

Steps:

1. Navigate to the administrative settings area.
2. Open the permissions management section.
3. Select Group Permissions.
4. Select the group to update, or create a new group with the required permissions.
5. Choose Add/Remove Members.
6. Use the search field to find the user.
7. Select the user from the results.
8. Confirm the user selection (for example, by checking the box next to their name).
9. Select Add.
10. Save changes to apply the updated permissions.
